PROFESSIONAL SUMMARY

Seasoned PHP developer with **10+ years** building scalable, high-performance backend systems for compliance, gaming, healthcare, e-commerce, and real estate domains. Deep expertise in **Laravel, WordPress, Docker, Redis, and RESTful APIs**. Proficient in backend architecture, API design, caching strategies, and SaaS platform development. Actively embracing **AI integration** — holder of the **Google AI Essentials Specialization** (5/5 courses) and currently mastering **ComfyUI** for generative AI image workflows. Recognised with a **performance incentive award** for a CTO-led production deployment at ControlCase.

KEY PROJECTS

ControlCase — Enterprise Compliance Hub

Laravel · WordPress · Docker · Redis · WPML

Compliance platform with Laravel backend, multilingual WordPress support, and secure high-performance APIs.

- Led backend architecture for Laravel Compliance Hub with optimised DB queries and caching
- Custom WordPress widgets & plugins; WPML multilingual support across global regions
- Contributed to GRC7 (Core PHP) and GRC9 (Laravel) platforms
- Built PCIUA training portal — React frontend, Python backend, Laravel APIs

★ Incentive Award — CTO-led Production Deployment

RIZE — Gaming Platform

ReactJS · Laravel · Docker · Redis

- Architected scalable Laravel RESTful APIs; optimised DB structures for high-volume user data
- Resolved performance bottlenecks; seamless ReactJS frontend integration via agile sprints

Fuse — Recruitment Platform

PHP 8 · Laravel

- PHP 7 → 8 migration with zero major downtime; refactored legacy code to modern standards
- Designed recruitment & pipeline management modules; managed production deployments

Mindreach — Workflow Automation

Laravel · Vue.js · Pusher · Redis

- Real-time chat (Laravel + Pusher + Vue.js); Redis caching; automated task-assignment workflows

Dokpam — Health Platform

Laravel · Stripe · PayPal · Paystack

- Doctor-patient APIs with scheduling; integrated Stripe, PayPal & Paystack across regions

Other Notable Projects

Laravel · WooCommerce · WordPress · Vue.js · Docker

- **Property Finder** — Google Maps + Redis-backed property search with advanced multi-criteria filtering
- **Weed (Headless E-commerce)** — WooCommerce → Laravel migration using Bagisto & Lunar PHP
- **Duracell Global** — Multilingual WooCommerce with WPML; on-page SEO implementation
- **YED / BuyersParade / Norgas** — Dynamic reports, subscription flows, Stripe, complex WooCommerce
